

Underground Pipe & Asphalt Replacement (UPAR) FAQ

1 What is the City planning to do on my street?

- ⇒ The City will be undertaking a series of important road repair activities on your street. These improvements include:
- **Concrete Repair:** Damaged or uneven sidewalks and curbs will be replaced where needed to ensure pedestrian safety and accessibility.
 - **Road Milling:** The existing road surface will be milled, which involves removing a layer of the old pavement.
 - **Asphalt Paving:** A new layer of asphalt will be applied to the road.
 - **Water Line & Sewer Line Repair:** Water and Sewer lines will be replaced. This will involve digging trenches, laying new pipes and connecting them to the existing system.

2 What are the specific areas where construction will take place?

- ⇒ Construction will occur at 15th Avenue between 97th Street and 100th Street.

3 When will construction start and how long is it going to take?

- ⇒ See attached map for zoning.

Zone	Work to be Done	Location
1	- Concrete Repair - Road Milling - Asphalt Paving	15 th Avenue from edge of 97 th Street to the edge of 99 th Street
2	- Concrete Repair - Road Milling - Water Line Repair - Sewer Line Repair - Asphalt Paving	15 th Avenue from the intersection of 99 th Street to the edge of 100 th Street *Water Line and Sewer Line Repair is expected to take 2 weeks starting September 3, 2024. The entire road will be closed during this period.

- ⇒ Road paving will require the road to be closed for up to 2 days. This will be done after all the underground work has been completed.
- ⇒ Target completion for all construction will be the end of September. The length of time required for these projects varies greatly depending on what work needs to be completed.
- ⇒ The project timeline may be modified based on weather and many other factors that can change the course of the construction schedule.

4 Will I be notified of the construction's progress?

- ⇒ Construction signs will be placed on your street to provide timely updates.
- ⇒ The City will post information on its website and social media channels.
- ⇒ The City will be conducting bi-weekly zoom meetings with representatives from the City and the Contractor. This is also open to the public and will be posted on the City's website so they may be viewed at a later date.

5 Can I park on the street during construction?

- ⇒ During construction, you will need to find an alternate place to park in order for the construction crew to work unobstructed and to avoid any damage to your vehicles. At some stages of construction, there may be times where the contractor will allow you to park in your driveway or near your home, however, this request shall only be granted by the construction supervisor or someone else in charge of operations. The safest place for you and your vehicle is outside of the construction zone.
- ⇒ For residents who will have limited access to their driveways or back alleys, street parking restrictions have been temporarily lifted for the following areas:
 - 98th Street from 16th Avenue to 14th Avenue.
 - 99th Street from 16th Avenue to 14th Avenue.
 - 16th Avenue from 98th Street to 100th Street.
 - 14th Avenue from 98th Street to 100th Street.

6 Will there be disruptions to traffic?

- ⇒ Yes, there will be some temporary disruptions to traffic. For routes with underground work (water and sewer line installations), a complete shutdown of the road is required. We recommend finding alternate routes during the construction period.
- ⇒ To assist with driving routes, construction crews will put up clear signage at key points. These signs will direct traffic away from construction zones and guide drivers to alternative routes. Please follow the signs to navigate around affected areas.

7 Will there be water service disruptions?

- ⇒ Possible temporary water disruptions might occur in all zones.

8 Where do I take my garbage and recycling during the construction?

- ⇒ If your street is under construction and the garbage truck will not be able to reach your bins, please put the bins on the front of your property approximately where you would for garbage pickup. The contractor will move the bins to a location where they can be picked up and then return them to your property. The contractor will be placing a label on your bins with your address to ensure that the bins will be returned to the correct address.

9 What happens with postal deliveries during construction?

- ⇒ The contractors will work collaboratively with postal workers. They will guide postal workers in accessing delivery routes, provide clear directions and assistance as needed to facilitate and maintain proper mail delivery.

10 How will these repairs benefit the community?

- ⇒ These road improvements will enhance safety, provide a smoother driving experience, and improve sidewalk accessibility.
- ⇒ The water line and sanitary sewer line will be upgraded with better materials to provide improved durability, quality and system efficiency.

11 Who do I contact if I have any problems or further questions?

- ⇒ Joe Gagne – Water Works & Roadways Manager – 306-445-1729.
- ⇒ Debbie Gallop – Water Works & Roadways Administrative Support – 306-445-1902.
- ⇒ City Hall – 306-445-1700 (Note: There is after hours emergency support at this number if required).
- ⇒ UPAR-specific inquiries – call or text 306-441-0359.
